**Progress**  
Adjustable & Fixed Height Bench

## Single Bench - Height Adjustable

Progress rectangular workstations offer user flexibility, enabling the work-surface height to be adjusted easily from 685mm – 1185mm, via a release lever.

Optional modesty panels are available to introduce privacy, where required.

The i-sit ergonomic seating range complements Progress desking, providing the user with a high level of personal adjustment.

Optional slab ends are available, providing a more executive configuration.

**Double Bench - Height Adjustable**

Double benches provide back to back workstations, available with either gas strut and fixed height workstations, according to a clients requirements.

**Double Progress Bench - Height Adjustable**

Dividing screen panels remain at a fixed height, enabling each work-surface to rise and fall without impacting on the screen. This ensures a consistent screen height within the working environment.

**Double Bench - Fixed Height**

Progress back to back double bench tops are scalloped on the back edge, enabling easy access into the horizontal cable trays.

Optional slab ends offer privacy at the end of a cluster.

The above image shows the desk frame when slab ends are not specified.

Sliding tops are supplied as standard on double benches. The cable tray is welded in a fixed position offering high capacity, horizontal wire management.

An optional spiral cable spine offers vertical wire management. Elite CPU holders are compatible with the Progress frame, offering an integrated solution.

Screen panels can be finished in MFC to complement or contrast the adjacent work surfaces.

Acrylic screens are available in six coloured options.

## Desk Mounted Screens

Screens fix to the back edge of the single workstation surface. The screen height will rise and fall as the workstation height is adjusted.

## Wood, Metal & Handle Finishes
